PROFILE

Tech Lead & Solutions Architect at Talan with 9+ years of experience in the Microsoft ecosystem. I design robust, scalable applications with .NET, Azure and modern DevOps practices, and build agentic AI systems, including SynexAI, a no-code AI agent platform I designed and developed solo. At Sogeti, I was co-technical lead of a service center (up to 20 developers), took part in Executive Committee (CODIR) presentations and in process industrialization, and was people manager of a team of ten for three years.

PERSONAL PROJECT

SynexAI

since Jan 2026

No-code web platform for creating AI agents · personal product, built solo

- Full agent harness: guardrails, error handling, tools, secure execution sandbox
- MCP servers, skills, sub-agent orchestration & delegation, RAG, memory, quotas
- Multi-provider LLM support to address sovereignty and governance requirements
- Spec-driven development with the BMAD framework
- .NET MCP server generating architecture docs for a “Solution Architect” agent

Stack: NestJS · React · Vercel AI SDK · MCP · Multi-agent · RAG · BMAD
